

TURBOTUNE®

CRITICAL PATH SOFTWARE, LLC

DATA COLLECTION DOWNLOAD INSTRUCTIONS JCL AS OF 09 MAY 2024

PLEASE NOTE: THESE DIRECTIONS MUST BE FOLLOWED EXACTLY.

- IN ORDER TO PRODUCE THE LISTCATS IN THE CORRECT FORMAT AND AVOID RE-RUNS.
- THERE IS ONLY ONE ACCEPTABLE OUTPUT FORMAT WHICH IS ACCEPTABLE.

EXPLANATION OF GOALS: THE OUTPUT FILE REQUIRED IS A **PRINTED REPORT** CREATED ON THE MAINFRAME BY ASSIGNING THE PRINTER TO A FILE AND THEN DOWNLOADING THAT FILE TO A DESK TOP P/C USING ASCII AND CLRF.

- THIS IS A TEXT REPORT. IT CONTAINS REQUIRED CARRIAGE CONTROL AND LINE FEED CHARACTERS CONTAINED IN POSITION 1 ON THE FAR-LEFT SIDE OF THE RECORD. THE DOWNLOADED FILE MUST BE DOWNLOADED AS AN ASCII FILE AND CONTAIN THE CRLF CHARACTERS.
- IF PKZIP FOR THE MAINFRAME IS AVAILABLE, ZIP THE FILE BEFORE DOWNLOADING TO A PC USING ASCII AND CRLF SO THAT IT CAN BE READ BY A PC.
- IF PKZIP FOR THE MAINFRAME IS NOT AVAILABLE, THEN USE PKZIP OR WINZIP TO ZIP THE FILE ON THE P/C AFTER DOWNLOADING FROM THE MAINFRAME TO THE P/C (USING ASCII AND CRLF).

THE OUTPUT FILE SHOULD BE A .TXT EXTENSION. SEE NOTE AT THE BOTTOM OF THIS DOCUMENT FOR MAC USERS.

IMPORTANT NOTES:

- TIME TO COMPLETE APPROXIMATELY 90 MINUTES:
- ALL DATA GATHERED IS NON-SENSITIVE AND PRESENTS ZERO SECURITY RISK.
- YOUR CLIENT ID IS ALREADY CODED INTO THE JCL. PLEASE REFERENCE THIS ID FOR ANY COMMUNICATION MOVING FORWARD.
- EACH CPU MUST BE LISTCAT INDEPENDENTLY.
 - CPS REQUIRES CPU SYSID TO DEVELOP THE NECESSARY AUTOMATION FOR IMPLEMENTATION. THIS WILL MAKE YOUR JOB VERY SIMPLE.
- A TEXT FILE CONTAINING THE JCL [WITH YOUR CLIENTID] ACCOMPANIES THIS FILE. IF YOU DO NOT RECEIVE THE JCL FILE, OR IT DOES NOT CONTAIN A UNIQUE CLIENTID ON LINE 7 OF THE JCL ["SET CLIENT= XXXXXXXX"] STOP AND CONTACT YOUR CUSTOMER REPRESENTATIVE IMMEDIATELY.
- UPLOAD TO THE CPS SECURE SERVER A TXT FILE WITH:
 - JOB CARD INFORMATION / PDS NAME / VOLUME AND UNIT OF PDS FOR THE SYSID IN WHICH THE IMPROVEMENTS WILL BE EXECUTED.

RUNNING THE JOB:

STEP ONE: RUN IDCAMS USING THE ACCOMPANYING JCL;

STEP TWO: DOWNLOAD THE OUTPUT DATASET TO A P/C USING ASCII AND CRLF.

STEP THREE:

- RENAME THE FILE TO "CLIENTID.SYSID.TESTORPROD.DATE.TXT"
 - INDICATE IN THE NAME IF IT IS TEST OR PRODUCTION.
- ZIP THE FILE IF NECESSARY.
- UPLOAD THE FILE USING THE SECURE SERVER LINK PROVIDED BY YOUR REPRESENTATIVE.

COMPLETE:

- CRITICAL PATH SOFTWARE WILL BE ALERTED TO THE SECURE SERVER UPLOAD HOWEVER PLEASE ALERT YOUR REPRESENTATIVE THE FILE(S) HAVE BEEN UPLOADED.

NOTEFOR MAC USERS:

ON A MAC, CR IS CONTROLLED BY THE CR COMMAND. THIS TOGGLES CR ON/OFF. BY DEFAULT, IT IS ON. WHEN DOWNLOADING ON MAC'S, CRLF IS IGNORED AND IT USES THE CR DEFAULT TO STRIP CR FROM EVERY LINE.

THE SEQUENCE OF COMMANDS FOR DOWNLOADING ON THE MAC, IS

```
ASCII  
CR  
GET ...
```

THE CR WILL THEN TOGGLE OFF THE CR STRIPPING.
